

USB-A CHARGING

Mid Continent Controls offers a line of "Type A" USB power charging ports for travelers that require power to charge their personal electronic devices (PED's). Charging your PED's has never been easier with our compact light-weight USB power products. These high-power charging ports will charge electronic devices such as GPS, smart phones, multimedia players and tablets.

This design features intelligent charging control circuitry capable of configuring the "DATA +" and "DATA-" pins for charging devices that utilize many varying charging formats. These ports have been DO-160G tested. We offer a variety of options including front and rear mount designs, along with offering ports with and without lids.

SPECIFICATIONS

Part Number _____ 106408-1 Series
 NTE Weight _____ 2.8 oz
 Power Input _____ 28 VDC, 650mA(Max)
 Power Output _____ 5VDC, 3A (Max)
 106408-1 _____ Finish Per Customer PO
 106408-1-1 _____ Finish Clear Anodized
 106408-1-2 _____ Finish Black Anodized

Part Number _____ 106408-2 Series
 Cover _____ Lidded
 NTE Weight _____ 3.1 oz
 Power Input _____ 28 VDC, 650mA(Max)
 Power Output _____ 5VDC, 3A (Max)
 106408-2 _____ Finish Per Customer PO
 106408-2-1 _____ Finish Clear Anodized
 106408-2-2 _____ Finish Black Anodized

Part Number _____ 106416-1 Series
 Backlight _____ Blue
 NTE Weight _____ 2.6 oz
 Power Input _____ 28 VDC, 1A(Max)
 Power Output (each) _____ 5VDC, 2.1A (Max)
 106416-1 _____ Finish Per Customer PO
 106416-1-1 _____ Finish Clear Anodized
 106416-1-2 _____ Finish Black Anodized
